Well, here we go again! Grassroots verses MONEY. Why does it always come down to this when dealing with government? I pay for XM Radio and I want to be able to hear whatever content that is available....either now or in the future. The point is that I CHOOSE to spend my money to hear what I LIKE. Not the dribble that is offered up by commercial radio. What a joke! Where does the government get off telling me what I can or cannot buy? C'mon guys. I'm sure that there are MUCH more important issues to deal with than what a person can hear on satellite radio. Get real!!
